## Installation Sheet

# Duct Wraps

(with rFoil Reflective Insulation)

- Quick, easy and safe to install
- Provides reflective insulation for radiant heat loss or gain
- Reflects up to 97% of radiant heat
- Unaffected by moisture and humidity

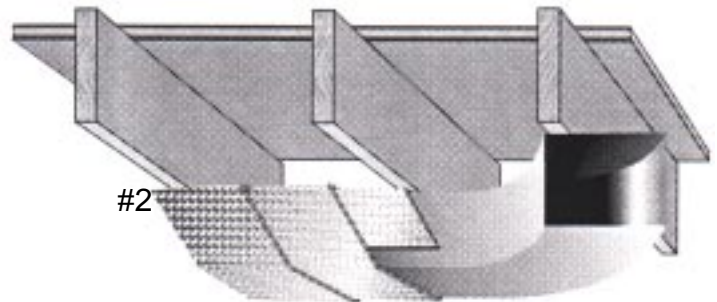

### Installation #1: Lineal Duct Wrap

1) Fasten rFoil 2" strips around the duct with duct tape. By placing these every 2 - 3 feet, you create the air space needed to achieve the optimum R-Values (R-6.2)

2) Wrap rFoil around the Duct

3) Tape it in place and tape all adjoining seams (All tape should be applied using a flat edge taping tool to ensure good adhesion).

### Installation #2: Spiral Duct Wrap

1) Wrap the duct using 12" wide pieces of rFoil. Overlap each layer 1" and don't leave any open air space or exposed duct.

2) Fasten the end with reflective tape (All tape should be applied using a flat edge taping tool to ensure good adhesion).
