## Installation Sheet

# Steel Frame Building

## Roof Application - Drape Method

- Ideal insulation for steel frame building application
- Quick and easy to install
- Provides reflective insulation for radiant heat loss/gain
- Blocks up to 97% of radiant heat
- Excellent vapor barrier
- Greatly reduces condensation
- Unaffected by moisture and humidity

- 1) Starting at an end of the building, apply two-sided tape on the first C or Z channel.
- 2) Roll out rFoil Reflective Insulation, allowing it to sag between the rafters, creating a 1" (approx). air space between the **top** of the foil and the **bottom** of the roof panel.
- 3) Seal all seams with 2" Reflective Foil Tape (All tape should be applied using a flat edge taping tool to ensure good adhesion.)
- 4) Attach metal roofing with usual method.
